Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Poledna discussed claim 22 initially, stressing the "reflective" aspects of the claim compared to the microlens array of Gallatin. The Examiner agreed that Gallatin does not show the reflective changes as claimed in claim 22. Proposed amendments to claims 1 and 15 were then discussed. These changes would add the reflective nature of changing the intensity distribution to overcome the prior art of Gallatin. The Examiner agreed that these changes would overcome the relied upon prior art as well. Finally, claim 35 was discussed as containing a feedback control loop. Mr. Poledna asserted that the prior art does not show this feedback control, but the Examiner pointed out that feedback control is well known in the art and that a 35 USC 103 rejection of prima facie obviousness could be made if the claim remained in its current form. The Examiner suggested adding language similar to that proposed for claims 1 and 15 to overcome the prior art. Mr. Poledna said he would take it under consideration prior to filing a response..
